Tailwind • RWD • MUI • JavaScript
TypeScript • React • Next.js • Zustand
RTK • Atom • React HOOKS
React Query • Formik • React form hook
Context API • Redux • RESTful APIs
Angular • Firebase • Version Control (Git)
Axios • MySQL & MSSQL • OOP • C#
.NET Framework • .NET Core • LINQ
Entity Framework • ASP.NET MVC
Postman • ASP.NET WebAPI
Familiar with:
SOLID • DesignPatterns • Docker Figma
• NPM • ESLint • Agile • Jira

SOFT SKILLS

Team-work • Creativity • Quick-Learning

EXPERIENCE

PHARMACY MARTS | Frontend Developer

August 2023 - present

- Pharmacy Marts is a digital marketplace that connects pharmacies and medical suppliers to easily, conveniently and quickly access and receive medicine, medical supplies and cosmetics.
- Implemented revamped website designs and a new cart system that
  1. facilitates customers to place their orders with super control over their updated cart.
  2. placed Ads on Landing-category-products screens.
  3. keeps customers informed about their order status.
  4. recommend other products if their cart product is out of/low in stock.
- Collaborated in the implementation of the delivery system website that
  1. manages various aspects of our delivery process, including user role assignment, invoice handling, and returns collection.
  2. Enhance operational efficiency by addressing the bulk action limitations.
  3. Reduce operational and resource costs associated with other solutions.
- Collaborated with cross-functional teams, including designers and backend developers, to develop and implement front-end solutions for Pharmacy-Marts different platforms.
- Implemented UI designs and ensured consistency across different browsers and devices.
- Participated in code reviews to ensure code quality and adherence to best practices.
- I was responsible for refactoring and eliminating legacy code to replace it with a new one that fits SOLID principles.
- Wrote multiple storybook stories for each UI component to be able to manually test them or automatically visual-test them using Chromatic.
- Integration with Mixpanel to capture data on how users interact with our digital product, and analyze this data with simple, interactive reports that let you query and visualize the data with just a few clicks.
- Technologies used: Typescript, React, Redux, Zustand Headless-UI, Storybook, Tailwind CSS, Git, RESTful API, React Query, React form hook, ZOD, Jira.

MAGLATECH - AFDV MARKETING | Frontend Developer

Jan 2023 - Jun 2023

- AFDV Marketing is a consultancy specializing in marketing services for small-to-medium-sized businesses.
- developed the new official website for the company using Next.js. I built multiple reusable UI components and made sure the project is scalable, easily extendable, and pixel-perfect to the Figma design.
- one of my projects there was ARTE.BLVD Project, Art Shop, I developed the front end of their eCommerce platform using Next.js & TypeScript. I was responsible for building the UI and integrating it with the backend endpoints.

FREELANCE | Frontend Developer

June 2022 - present

- For Codemy, Coding Courses Provider, I Worked on the prototype of the website using React, TypeScript, RTK, Firebase & Tailwind CSS. I was responsible for building the UI and contributed to the UI/UX design.
